This file is automatically generated from Nomina.bib, which is itself automatically generated from Nomina_contents.html by a program I wrote myself (Nomina_to_bibtex_01.py). The file Nomina_contents.html is itself generated from a plain ascii .txt file by txt_to_html_01.py. The bibliography uses a style file JEPNS_biblatex.sty written by me, together with the biblatex package. There are 319 articles here, covering all volumes to 32 (2009).
